17/8/2019 Lighthouse Report

Accessibility

These checks highlight opportunities to improve the accessibility of your web app. Only a subset of accessibility issues can be automatically detected so manual testing is also encouraged.

Contrast — These are opportunities to improve the legibility of your content.

Internationalization and localization — These are opportunities to improve the interpretation of your content by users in different locales.

<html> element does not have a [lang] attribute

Names and labels — These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

▲ Form elements do not have associated labels

Additional items to manually check (11) — These items address areas which an automated testing tool cannot cover. Learn more in our guide on conducting an accessibility review.

Passed audits (7)

Not applicable (25)

Best Practices

▲ Does not use HTTP/2 for all of its resources — 5 requests not served via HTTP/2

Passed audits (14)

SEO

These checks ensure that your page is optimized for search engine results ranking. There are additional factors Lighthouse does not check that may affect your search ranking. <u>Learn more</u>.

Content Best Practices — Format your HTML in a way that enables crawlers to better understand your app's content.

Progressive Web App

These checks validate the aspects of a Progressive Web App. <u>Learn more</u>.

Fast and reliable Page load is fast enough on mobile networks Current page does not respond with a 200 when offline start_url does not respond with a 200 when offline No usable web app manifest found on page. Installable Uses HTTPS Does not register a service worker that controls page and start_url Web app manifest does not meet the installability requirements Failures: No manifest was fetched. PWA Optimized Does not redirect HTTP traffic to HTTPS Is not configured for a custom splash screen Failures: No manifest was fetched.

Does not set an address-bar theme color

	Failures: No manifest was fetched, No ` <meta name="theme-color"/> ` tag found.	`
•	Content is sized correctly for the viewport	`
• 1	Has a <meta name="viewport"/> tag with width or initial-scale	`
	Contains some content when JavaScript is not available	\
A I	Does not provide a valid apple-touch-icon	\

Additional items to manually check (3) — These checks are required by the baseline <u>PWA Checklist</u> but are not automatically checked by Lighthouse. They do not affect your score but it's important that you verify them manually.
